

# Retractable Banner Stands

*Retractable banner stands are designed to allow the banner graphic to roll back into the base, protecting your banner and making them a sturdy but portable option for applications like temporary wayfinding, sponsor recognition, and capturing attention at events. They feature a rugged carrying case and are built to take the bumps and bruises of travel without being difficult to transport.*

## **Here's how to get started:**

### **Graphic Size**

*Large: 33.5" wide by 84.5" tall*

*Small: 27.5" wide by 76.75" tall*

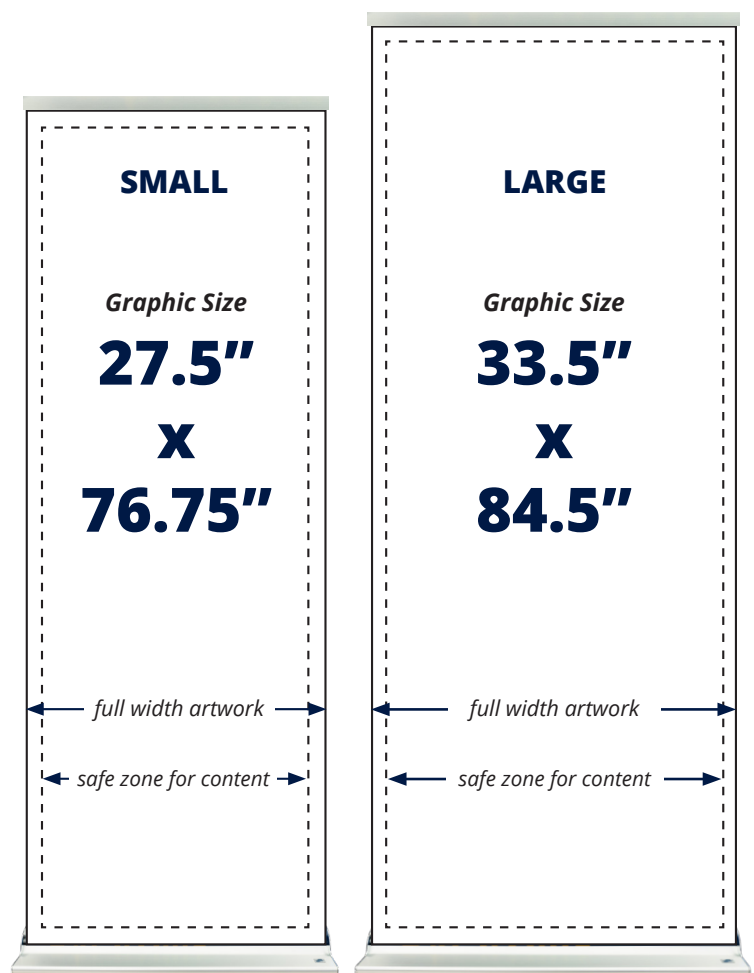

*Your background colors and images can fill the entirety of the visible space, but we recommend leaving a 2" margin on all four sides of your artwork to ensure your text or other content isn't too close to the edge.*

### **File resolution and format**

*We prefer a 150 ppi PDF. A lower resolution file may not print well and a higher resolution file will be downsampled.*

### **Placing an order**

*Simply bring us your file on a USB drive or submit an order online at [datelinedigital.com/bannerstand](http://datelinedigital.com/bannerstand)*

# Roll up Banner Stands

*Roll up banner stands offer a slim, lightweight, and highly portable design for applications like temporary wayfinding, sponsor recognition, and capturing attention at events. When not in use, simply roll up the graphic and store everything in the included rugged carrying tube that is built to take the bumps and bruises of travel without ever being in the way.*

## ***Here's how to get started:***

### **Graphic Size**

*Large: 33.5" wide by 85" tall*

*Small: 27.5" wide by 77" tall*

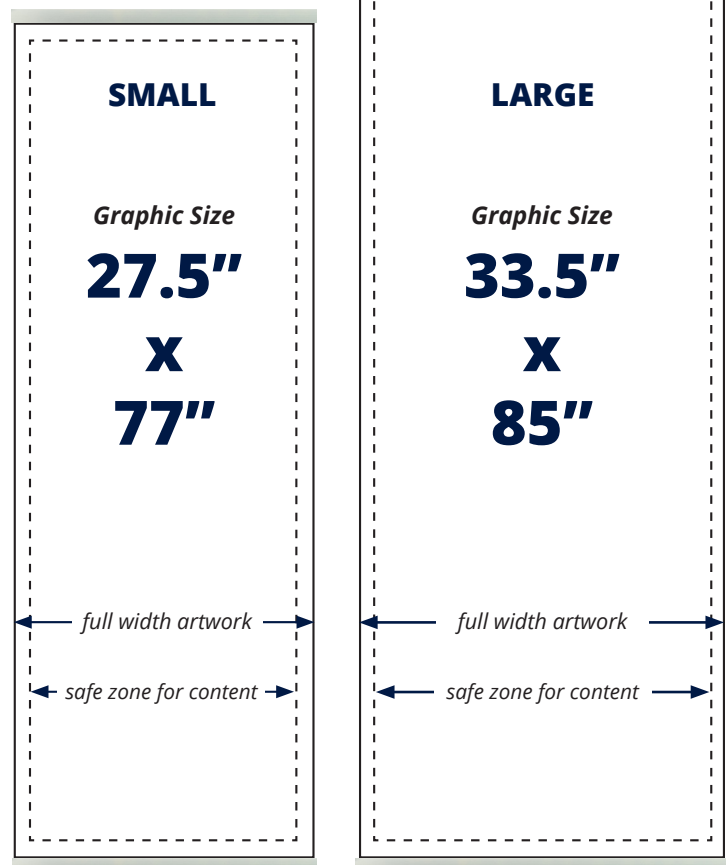

*Your background colors and images can fill the entirety of the visible space, but we recommend leaving a 2" margin on all four sides of your artwork to ensure your text or other content isn't too close to the edge.*

### **File resolution and format**

*We prefer a 150 ppi PDF. A lower resolution file may not print well and a higher resolution file will be downsampled.*
